PVA Sponge Roller Covers for Wet Process

PVA Sponge Roller Covers are a superior covering for any Wet Process roller where water needs to be removed, including: -

- Pumice scrubbing
- De-burring
- Warm water brushing
- Rinsing

Absorbing up to 12 times its dry weight in water, PVA exhibits great mechanical strength and abrasion resistance.

Wet PVA sponge will withstand temperatures to 90°C without plastic deformation.

Contact us for a quotation, with the following information: -

- Quantity required
- Inside diameter required
- Outside diameter required
- Whether measurements were made wet or dry
